18th Sept 1992  
Bangalore

*I find happiness in making an impact on customers using technology!*

**MG UNIVERSITY KOTTAYAM**  
MCA - CGPA 8.0

**MADURAI KAMARAJ**  
BCA - CGPA 8.2

**TECHNICAL SKILLS****PRIMARY:**

HTML  
CSS  
JQUERY  
ReactJs  
Angular8

**SECONDARY:**

JavaScript

**ACHIEVEMENTS**

First Rank In English (MKU)

Rajya Puraskar (Bharat Scouts & Guides)

**LINKS****VR Assurance**

Website : vrassurance.com

Here I worked on MACT (Motor Accident Claim Tribunal). This module is an integral part of VR Assurance, which handles the complex process involved in processing the insurance claims. I have contributed to the UI development of the MACT flow. The process flow starts with an executive entering the claim form to the MACT module. This form will get forwarded to multiple users within the system. Once all the approval is done the MACT flow is considered to be closed and further claim process begins.

Responsibilities: Developed responsive UI (customer facing, vrassurance.com) with Bootstrap UI framework,

**E Community**

Website : ecommunity.io

E Community project is developed for a client from UAE. This project was developed for maintaining a large group of apartments, where each resident can raise service requests and it will be chained through a series of operation teams. We have many user modules for this project, each will have their own responsibilities for resolving a service request.

Responsibilities : The ticket processing flow contains various features based on the role of the user. I have integrated role based APIs, where we display the UI components based on the role of the logged in user. I have integrated various APIs, and worked on responsive UI development. Coordinated with the UX team and client to come up with user friendly designs. Defined various routings with Angular 8. Learned and explored many Angular features during this project.

**InformaticsIQ**

Website : informaticsiq.io

InformaticsIQ is a bigdata company providing various use cases around bigdata technologies. This project was developed to showcase their product and services via an interactive website. This is a static website.

Responsibilities : Participated in stakeholder discussions to figure out contents for the website. Developed the design using html 5, css and bootstrap. Coordinated with the UX team to come up with modern design techniques, interactive banners and color schemes.

**Muthoot Insurance**

Website : internal

This module is a part of muthoot insurances. Project was consisting of different modules related to vehicle insurance. We mainly worked on maintenance and adding new features to the existing project.

Responsibilities : This project was developed on ReactJs framework. My responsibilities included several bug fixes and maintenance activities on the product. I have learned ReactJs and component based development by working on this product.

**TaurusCare**

Website: Internal

This is an IoT based project. This project mainly deals with identifying the location, behavior of cattle in a big farming environment, where I have integrated telemetry data coming from the device/backend to Map box for plotting the live locations of cattle.

Responsibilities : Participated in discussions to figure out contents for the website. Developed the design using html 5, css 3 and bootstrap.
